1,500 square feet

Timeline

3 Days

ColorMedium Gray Epoxy
with Black, White,
Powder Blue, Glow
in the Dark Flakes

In the pursuit of transforming his garage into a stylish haven for his prized automobiles, Jared was looking for a top quality epoxy floor coating to re-do his space. Driven by the desire for a durable and visually striking flooring solution, he set his sights on an industrial-grade epoxy. Recognizing the potential of the ArmorPoxy system, Jared aimed not only for resilience but also for a design that would enhance the aesthetic appeal of his garage, creating a sleek and personalized space that would complement the stature of his cherished cars. This venture would not only redefine the practicality of his garage floor but also serve as a canvas for an automotive-inspired garage hangout.

ArmorClad Epoxy Kit

Solution

Jared selected ArmorPoxy's **ArmorClad Epoxy** kit, a 100% solids epoxy kit with 2-part military grade topcoat with non-skid additive. The epoxy kit included everything needed for a DIY installation. Jared chose our Medium Gray epoxy as the base, he took customization to the next level with a unique flake combination for added texture. Adding a touch of creativity, Jared incorporated glow-in-the-dark flakes to infuse his garage with a cool vibe. This simple yet inventive addition not only enhanced the floor's aesthetic appeal during the day but also transformed the garage into a visually captivating space after dark. By combining durability with personalized design elements, Jared turned his garage floor into the ultimate garage and automotive space to hang in.
